PROFESSIONAL SUMMARY

I am a **Software Engineer with arround 1.5 years of experiance** and **currently Leads** the **backend** team in my Intern period, dedicated to building robust, **high-integrity web applications**. From architecting government grade **RBAC mechanisms** to delivering 10+ custom web solutions, my **experience** covers the full development lifecycle across **MERN, Django, and Spring Boot** ecosystems. I thrive in **Agile environments**, leveraging **Docker, AWS, and CI/CD pipelines** to ensure zero-downtime releases. I combine a deep academic foundation in **AI** and **Cyber Security** with the **practical leadership skills** required to manage distributed teams and complex digital migrations.

TECHNICAL SKILLS

- **Languages:** JavaScript , Java (Spring Boot), Python (Django, Flask), PHP, SQL.
- **Backend & Architecture:** Microservices, RESTful APIs, RBAC Design, JWT Authentication, System Modeling & Architecture Designing, Oop, Ood, System Design.
- **Cloud & DevOps:** Docker, AWS (EC2), GitHub Actions (CI/CD), Git, Linux.
- **Data & Databases:** MongoDB(mongoose) , PostgreSQL, MySQL, Redis.
- **Frontend:** React.js, Vite js, HTML5/CSS3, Tailwind CSS, Bootstrap.
- **AI & Machine Learning:** TensorFlow, Scikit-learn, Computer Vision, NLP (NLTK), Pandas, NumPy.
- **Tools & Methods:** Agile/Scrum, Pytest, Selenium, Postman, Requirements Engineering (SRS), User stories .

PROFESSIONAL EXPERIENCE

Trace Expert City (T2T) | Colombo, Sri Lanka

Software Engineer Intern | *Oct 2025 – Present*

*Accelerated in Intern to ability to **Leads the backend team within 4 months** for a particular project by mastering **enterprise grade MERN architecture**. This role strengthened my ability to align **Software full stack Development** with Digital Transformation goals while supporting Loan workflows through Digitalization and System Integration.*

- Spearheaded the **backend team** as an intern by **solving complex programming** challenges and leading high-level idea generation sessions to optimize system performance.
- **Collaborated in agile scrum environments** , Mastered **information gathering** and **requirements engineering** to **produce comprehensive architecture diagrams**, **flow charts**, and **business flow models** for stakeholders.

- Architected secure **migration strategies** to transition **legacy datasets** into modern **MERN** structures, resolving complex algorithmic bottlenecks to maintain 100% data integrity.
- Developed interactive dashboarding features that visualize key business metrics, providing stakeholders with real-time insights and actionable data-driven decision-making tools.
- Orchestrated **end-to-end full-stack implementation** by developing responsive **React** frontends and high-performance **Node.js & Express backends** to digitize enterprise-scale loan workflows.

Hixio Digitals | Colombo, Sri Lanka

Web Developer Intern | *Jul 2023 – Jun 2024*

custom plugins management *for full client lifecycles from intake to deployment.* ***Within five to six months****, I* ***transitioned into a leadership role****,* ***guiding*** *the team through Agile/Scrum sprint planning.*

- **Spearheaded** the delivery of **10+ dynamic web applications** and **custom PHP & WordPress plugins**, independently managing client lifecycles within 6 months.
- **Validated** third-party API reliability with 100% endpoint coverage via Postman automated test suites.
- **Maintained** a 100% on-time delivery rate within an Agile, Scrum environment by proactively leading sprint planning for backend modules.

Vision Path Academy | Sri Lanka

Programming , Full Stack Development & Mathematics Mentor | *Jul 2024 – Present*

- **Upskilled** 50+ students in **Java**, **Python**, **Web Development and Data Structures** through hands-on **debugging worksho**ps, leading to a measurable 1st grade level improvement in academic performance.

KEY PROJECTS

Enterprise Helpdesk Ticketing System | *Django, PostgreSQL, Celery, Redis.*

- **Impact:** Decoupled notification processing via Celery/Redis, cutting average API response times by **45%** under peak load.

Smart Workforce Management System | *Spring Boot, MySQL, Docker, AWS EC2.*

- **Impact:** Automated payroll and leave tracking for multi-department organizations; achieved zero-downtime releases via AWS-integrated CI/CD.

EDUCATION

Bachelor of Software Engineering (Hons) BSE | *Open University of Sri Lanka |2021 - 2026*

- **Special in Computer Engineering**, with exposure to C++, IOT and other Programming Language foundations, Operating System and Compiler Construction, Advanced Database Management, Data Modeling, Information Security, Cyber Security, AI & Agent Technology, Neural Networks, QA, Data Science.
